Games Played

- Crisis Brigade:

Crisis Brigade is a game about covering, pointing and shooting, fast-paced pure action. Intense shootouts, powerful weapons, challenging levels, fierce enemies... Like the 90's classic arcade machines, but with the immersion that Virtual Reality is capable of.

- Good graphics in minute detailing.
- Each and every sound effect mapped properly- user panting, dying, gunshots, reloading, trigger pulled.
- Instructions and audio feedback should have been more readable and understandable
- Lack of textual/ readable instructions.
- Welcome/ entry scene lacks clarity on what's happening, how should the user use controller seems confusing, seems too much of information loaded with no proper direction of what's needs to be done.

Games Played

Games Played

- Elixir:

A short game where user is a clueless apprentice to an awkward sorceress. She needs a human hands to operate her contraptions, and everything's just a little . . . unexpected. By the end, magic has a less-than-desirable impact on the anatomy of user's fingers, and it's nobody's fault but user's own.

- Hands free/ Hand tracked interactions- teleportation.
- Diegetic user interfaces.
- Lacks guidance to the user on what'll happen.
- Graphics could be better.
- Can be taken forward instead of restricting it to just a 7-8 minute game.
- Exploration factors creates curiosity which then leads to immersion but once all of it's done leads to quitting the app.

Games Played

- Carve Snowboarding

Dominate the mountain your own way with two unique modes: Show your need for speed and snag the top Leader Board spot in Time Attack! ; Master tricks and show off your skills in Freestyle, now with Leaderboards!

- Hands position allows you to snowboard (move across the slopes)
- Diegetic interfaces/ spaces- snowboard, gloves, song selection thru cassette player
- Has interactive elements in the cabin- grabbing objects, petting dog
- Too much of unnecessary instructions and prompts.
- Environment makes it more pleasing and explorative.

Games Played

- Tiltbrush:
Tilt Brush lets you paint in 3D space with virtual reality. Your room is your canvas. Your palette is your imagination. The possibilities are endless.
- Controller attached menu options with 3 different attached screens accessed through left & right joystick movement.
- Wide variety of magical design options
- Each option is display changes wrt selected environment
- Environment graphics could be improved
- Allows creating magical designs

Environment Inspo

- Apex Construct
- Dungeons of eternity
- Bigscreen
- First Touch
- Richie's plank
